

# Hope In The Age Of Dementia.

NEW SCIENCE. NEW KNOWLEDGE. NEW SOLUTIONS.

Dear friends,

Due to the evolving COVID-19 situation, the Singapore Government has raised the Disease Outbreak Response System Condition (DORSCON) level to orange and has advised against non-essential large-scale events. Following the advice by Singapore's Ministry of Health, we are postponing the ADI/ADA conference from 19-21 March 2020 to 10-12 December 2020.

We know you will be as disappointed as we are, but we have remained in close contact with our event organiser, SingEx and are pleased to confirm that we have re-scheduled the conference for 10-12 December 2020. We are also pleased to affirm that we are automatically carrying forward all registrations, abstracts, speakers and exhibitors, to make the change of date as seamless as possible.

We really appreciate your understanding and support at this time, and we know that you will all agree that the health and safety of our delegates and the wider ADI family is of utmost importance. For further updates, visit [www.adi2020.org](http://www.adi2020.org).

Our best,

Paola Barbarino, CEO, ADI | Jason Foo, CEO, ADA

Sign up for updates on the ADI conference, including information on key speakers, important dates and more at [www.adi2020.org](http://www.adi2020.org).
