

Support Persons Living with Dementia Care is a competency-based certification programme. It provides learners with the knowledge and skills required to support persons living with dementia in a variety of settings and residential.

This is a blended course and it consists of 3 modules and assessments:

Module 1	Apply Person-Centred Care
Module 2	Provide activities to maximise autonomy and promote wellbeing
Module 3	Develop and implement techniques which minimise the impact of changed behaviour

The competency assessment for this course consists of written assessment, practical performance (PP) and oral questioning (Total duration: 3.5hours)

Course Objectives

- Apply Person-Centred Care approaches to care planning for persons living with dementia
- Assess the needs of caregivers to provide information and referral to access relevant health and social services
- Provide activities to maximise autonomy and promote wellbeing
- Develop and implement techniques which minimise the impact of changed behaviour
